

William J. Moore III

Computer Science Senior | Software Engineering | Data Analytics | AI

Greensboro, NC | 336-830-6221 | WilliamJMooreIIICareer@proton.me | williamjmoore3.com | github.com/Wjmoore32001

EDUCATION

University of North Carolina at Greensboro - B.S. in Computer Science

Expected Jan 2027

Greensboro, NC | Overall GPA: 3.41 | Major GPA: 3.62

Current / Relevant Coursework: Artificial Intelligence, Algorithm Analysis & Design, Operating Systems, Software Engineering, Advanced Data Structures, Database Systems, Systems Programming, Computer Organization/Assembly, Calculus II

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL

Frameworks / Tools: Spring Boot, Spring MVC, Spring Data JPA, Django, PostgreSQL, Pandas, Jupyter, Git, Linux, Bootstrap, FreeMarker

Core: Data Structures & Algorithms, Object-Oriented Programming, MVC Architecture, REST-style APIs, Database Systems, Systems Programming, Data Analysis, Debugging

TECHNICAL EXPERIENCE

Global Career Accelerator - Coding for Data Accelerator

May 2026 - Jul 2026

Remote | Completed 3-month project-based data analytics program

- Completed project-based training in SQL, Python for data, Pandas, data visualization, data interpretation, and business recommendation writing.
- Completed analyses across sustainability, product monetization, construction demand, and public transit datasets using SQL and Python/Pandas.
- Built queries with joins, CTEs, CASE logic, GROUP BY/HAVING, subqueries, aggregations, filtering/sorting, and window functions, then translated results into written recommendations.

PROJECTS

Gym Class Hub - Java / Spring Full-Stack Web Application

Jan 2026 - May 2026

- Collaborated on a full-stack application for gym scheduling, enrollment, instructor workflows, and customer reviews using Java, Spring Boot/MVC, Spring Data JPA, PostgreSQL, FreeMarker, Bootstrap, and Git.
- Built instructor/provider features including dashboard and profile flows, class creation/scheduling, image support, enrollment views, review replies, browse filters, and protected-action redirects.

Intel Sustainability Impact Analysis - SQL / Data Analysis (Global Career Accelerator)

Summer 2026

- Analyzed a 601,740-row hypothetical Intel device-repurposing dataset using SQL, joining device and impact tables and engineering device-age cohorts with CTEs and CASE logic.
- Compared energy and CO2 savings by device type, age group, and region using aggregations and window functions; identified older devices as highest in per-device energy savings and laptops as about 68% of regional savings.
- Turned the analysis into a data-driven recommendation that balanced total device volume with per-device environmental impact when prioritizing repurposing efforts.

CERTIFICATIONS

Global Career Accelerator

Python and Data Certification

Aug 2026

Querying Data Certification

Aug 2026

AI Professional Skills Certification

Aug 2026

Intercultural Skills Certification

Aug 2026

ADDITIONAL EXPERIENCE

Mosquito Squad - Technician, Greensboro, NC

Jan 2023 - Jun 2023

- Serviced 10-20 residential properties per day, operated assigned routes, and communicated directly with homeowners while following safety and treatment procedures.

PetSuites - Dog Trainer, Greensboro, NC

Jan 2021 - Jan 2023

- Trained 5-10 dogs daily in group and one-on-one sessions; coordinated client progress updates and applied structured problem-solving to improve training outcomes.
